SunSmart Snippet

The simplest way

...to be SunSmart!

Unlike sunscreen, clothing can't be wiped or washed off, making it one of the best ways to protect your skin from damaging UV radiation.

For best protection choose:

- shirts with collars or high necks, and sleeves
- trousers or longer shorts and skirts that come to below the knees
- loose clothes, rather than fabric that is stretched across the skin
- fabric that has a close, dense weave
- dark colours (navy, black, dark red) absorb UV rays and prevent them reaching the skin better than white and light colours

Don't forget!

To ensure the best UV protection from April – September all sun protection measures are needed between 10.00am – 2.00pm
